

## Features

- High-output power level, up to 13 dBm to each of 8 ports
- Low noise figure
- Optical path isolation (input and output)
- Output power alignment
- Front panel laser On/Off interlock switch
- Hot plug-in/out
- Local and remote status monitoring and control
- Occupies two full-depth slots

## Broadcast Multiport Optical Amplifier

The Aurora CA3524 Broadcast EDFA is a high-output, eight port, extremely compact 1550 nm optical amplifier. Output power of 13 dBm to each of eight output ports is available in a double-width module designed for use in the CH3000 3RU chassis.

Designed and specified for a single broadcast optical carrier anywhere in the 1530 to 1565 nm optical spectrum, this high performance amplifier allows operators to drive multiple broadcast optical outputs with a single, space efficient device that minimizes external connections and eliminates the need for an optical splitter.

The compact design makes this amplifier the highest density EDFA in the market, dramatically reducing rack space requirements in the headend and hubs. This design enhances the deployment of traditional HFC, passive HFC and fiber to the home (FTTH) networks.

# CA3524

## Product Specifications

### Physical:

- Dimensions: 13.0" D x 5.25" H x 2.0" W  
(33 cm x 13.3 cm x 2.5 cm)
- Weight: 4.0 lbs (1.8 kg)

### Environmental:

- Operating temperature range:  
0° to +50°C (32° to 122°F)
- Storage temperature range:  
-40° to +85°C (-40° to 185°F)
- Humidity: 5% to 95% non-condensing

### General:

- Hot plug-in/out
- Mode of operation: Constant current
- Number of pump lasers: 2
- Output power alignment: Manual

### Power Requirements:

- Input voltage: 12 V<sub>DC</sub>
- Power consumption: 18 W

### Optical Interface:

- Optical connectors (input and output): SC/APC

### Optical:

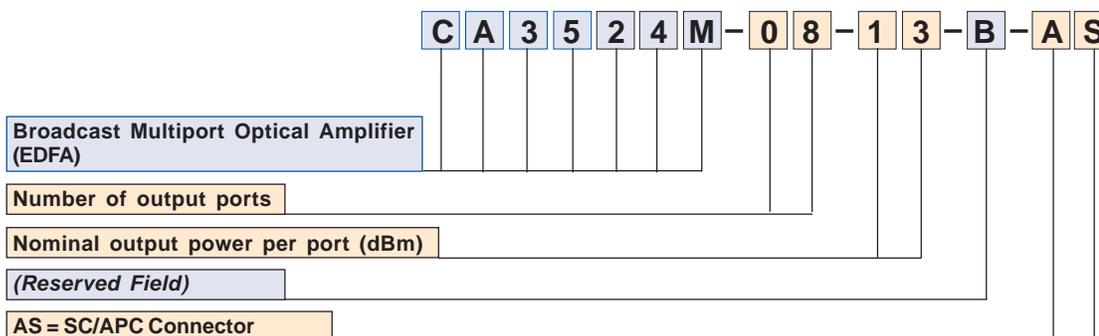

- Input signal wavelength: 1530–1565 nm
- Input power range: -10 to +10 dBm
- Optical signal path isolation: >30 dB
- Output power stability: ±0.6 dB
- Output power margin (for each of 8 output ports):  
0.4 dB min (at 0 dBm input)  
0.8 dB max
- Output power adjustment range, min: -3.0 dB  
(from nominal output power)
- Uniformity: 0.8 dB highest port to lowest port

### Performance Parameters:

Model Number	Output Power, nominal (dBm)	Noise Figure, typical <sup>1</sup> (dB)	Noise Figure, max <sup>1</sup> (dB)
CA3524M	8 x 13	4.5	5.0

<sup>1</sup> Measured optically at 0 dBm input,  $\lambda = 1545$  and 1563 nm in vacuum,  $T_A = 25^\circ\text{C}$ .

## Ordering Information

Required Module Back Plate

**B P - F 9**

Back Plate is included with ordered module.

**Corporate Headquarters**  
 5400 Betsy Ross Drive  
 Santa Clara, CA 95054  
 Tel 408.235.7000  
 Fax 408.845.9045
