PU-X810P 1GE + PoE PD

PoE

Overview

PU-X810P dual-mode ONU is one of the XPON optical network unit design to meet the requirement of the broadband access network. It apply in FTTH/FTTO to provide the data, video service based on the XPON network.

PU-X810P dual-mode ONU supports both EPON and GPON modes access. It automatically switches into the corresponding PON mode by identifying the front end OLT mode to complete GPON or EPON adaptive access.
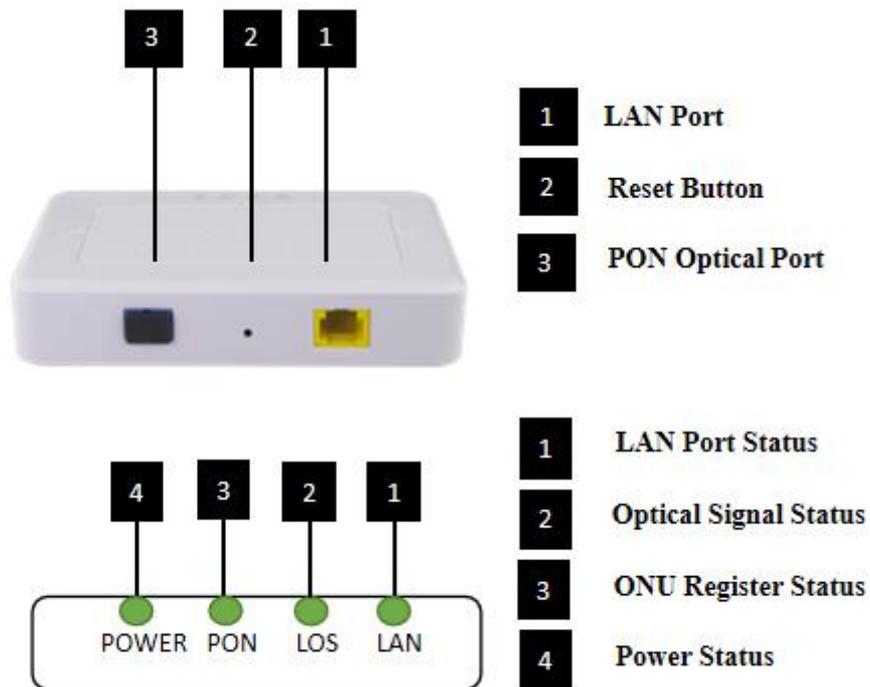

PU-X810P fully meets IEEE802.3ah and ITU-T G984.X standard protocol. It has a high reliability and provide quality of service guarantee, easy management, flexible expansion and networking. It has good third-party compatibility to work with the third party OLT, such as Huawei/ZTE/Fiberhome/Alcatel-Lucent.
